Education

National Institute of Technology

Bachelor of Technology in Computer Science, CGPA: 8.85

Aug 2024 – May 2028

Agartala, Tripura

Relevant Coursework

- Data Structures
- Database Management
- Computer Networks
- Object-Oriented Programming
- Analysis of Algorithms
- Artificial Intelligence
- Computer Architecture

Experience

DSAI Club, NIT Agartala

Core Technical Member

May 2025 – Aug 2026

Agartala, Tripura

- Developed **5+ machine learning models** that improved accuracy by 15%
- Performed data preprocessing, feature engineering, and exploratory data analysis using **NumPy, Pandas, and Seaborn**, working with datasets containing **10,000+ records**.
- Led technical implementation and documentation efforts across 3+ club projects and initiatives.

Projects

Lumina EdTech Platform | [Website Link](#) | MERN Stack, MongoDB Atlas, Gemini API

December 2025

- Developed a full-stack MERN-based EdTech platform with Google OAuth 2.0 and JWT authentication, enabling secure access and persistent user sessions across devices.
- Engineered **20+ RESTful API endpoints** for authentication, course management, enrollment, progress tracking, and AI-powered interactions, backed by MongoDB Atlas.
- Built a responsive React Single-Page Application with **15+ reusable components** and optimized state management, delivering a seamless user experience across desktop and mobile devices.
- Integrated the Google Gemini API to provide real-time AI-driven course assistance, personalized learning support, and instant query resolution within the platform.
- Deployed the frontend on Vercel and backend on Render with automated GitHub-based deployments, achieving reliable hosting and streamlined CI/CD workflows.
- [GitHub Repository](#)

Cosmet - Cosmetic Ingredient Analyzer | [Website Link](#) | Next.js, FastAPI, Redis, Qdrant, Gemini API

June 2026

- Built 4-agent LLM system using LangGraph + Gemini 3.1 with intelligent routing, retry logic, and multi-gate validation
- Optimized embeddings pipeline: replaced PyTorch with FastEmbed (ONNX), reducing deployment size by 1.5GB while maintaining accuracy
- Implemented passwordless Google OAuth 2.0 + JWT token refresh with transparent interceptor for seamless auth flow
- Created personalized safety scoring algorithm adjusting ingredient risk based on user allergies, skin type, and concern profiles
- Deployed full-stack across Vercel, Render, Qdrant Cloud, Redis Cloud with CORS, rate limiting, and graceful fallbacks
- [GitHub Repository](#)

Technical Skills

Programming Languages: Python, C++, JavaScript, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Responsive Web Design

Backend: Node.js, Express.js, FastAPI, RESTful APIs, Authentication (JWT, OAuth 2.0)

Databases: PostgreSQL, MongoDB, Redis, Qdrant, Supabase

AI and ML: LangGraph, Gemini API, Scikit-learn, XGBoost, Pandas, NumPy

Tools & Platforms: Git, GitHub, Vercel, Render

Achievements and Certifications

- Solved 400+ Data Structures and Algorithms problems on [LeetCode](#), strengthening problem-solving and algorithmic thinking.
- Secured Runner-Up position in BIZHACK, a business hackathon organized by the Business Club, NIT Agartala – [Certificate](#)
- Completed CS50's Introduction to Programming with Python – [Certificate](#)
